KBC CO-PILOT PROGRAM™

A SECOND PAIR OF EXPERT EYES TO ASSURE YOUR FACILITY ACHIEVES ITS FULL POTENTIAL

Just as the co-pilot of an aircraft is there to assist the pilot with additional knowledge and to step in and help at times of intense activity, the KBC Co-Pilot is there to remotely support your facility with our expertise, insight and technology, supplementing your own capabilities and resources. Using the latest secure cloud-based technologies, the KBC Co-Pilot assures that your facility will always achieve its full potential.

The collaboration portal displays indicators on a dashboard and allows client teams and Co-Pilot to exchange questions, analysis and corrective actions. Results are available on mobile devices.
